Create A Landmark With Exciting People Places
It's a known fact that dull uninteresting spaces have a negative effect on the people who shop or even work in them. **Banners add excitement and profitability**

Colorful, cheerful architectural banners can literally improve attitudes and productivity of workers and have a positive effect with shoppers on your property. And what's more important is the effect on profitability. Sales in malls can actually increase after banners are installed.

Not only do banners add beauty and life to a space, but they can provide information and help direct traffic to a targeted area.

We can help you bring your property, your people and your customers to life with architectural banners manufactured by BannerScapes.

Full Color Digital Banners

With the advancements in digital solvent, acid dye, sublimation and dispersion dye printing, we now have 100’s of options and variations to offer in full color digitally printed banners. Each job is a little different and we offer a broad range of solutions that are best for your job. We can manufacture the standard vinyl banner or a hybrid using a mixture of materials to best solve your needs. We offer all kinds of options and take pride in the extensive range of finishing options. All of our stitching is lock stitched with double needles and all of our grommets are spur type. We make some of the strongest banners available and extra reinforcements, webbing, gussets and large X strong grommets and D-Rings are standard for us.

200 denier, 3.2 oz. (min. 60 colors to select from)

**Printed**
Requires screens and Setup Charges

**Single Sided** - Positive front, Back blank
Back blank with ink bleed through from front. Solid liner can be added to cover ink bleed-through and add strength.

**Single Construction** - Positive front, reverse backside
Light color ink on dark background advisable if only front side is visible. (same as single sided)
Dark color ink on light background nylon will read positive front side and reverse on back side.

**Double Construction** - Positive front and back
2 fields sewn back to back. Light color on dark background must be double construction.
Dark color on light background requires an opaque liner.

**Double Construction** - Seals Only
Only portion of flag or banner with graphics is sewn back to back to read positive both sides.

---

**Applique**
(Hand Sewn Lettering and Graphics)

**Single Sided** - Positive front with no back design, Solid color on back with stitching showing
Solid liner can be added to cover stitching and add strength.

**Single Construction** Positive front, reverse back
Background colors trimmed away to form a stained glass window effect. Not recommended for exterior use.
Fabric layered on both sides of field to create design
Recommended for exterior use.

**Double Construction** - Positive front and back
Light colored background requires liner.

---

**Banner Construction**

Printed
Requires screens and Setup Charges

Single Sided - Positive front, Back blank
Back blank with graphics only on front. Solid liner can be added to cover ink bleed-through and add strength.

Double Sided - Positive front, reverse backside
Dark color ink on light background will require printing backside in reverse using an additional set of reverse screens.

Double Sided - Positive front and back
Light color ink on dark background works best if printing on both sides of same piece of fabric.

Double Construction - Positive front and back
2 fields sewn back to back. Dark ink on light background requires an opaque liner. Works best with light ink on dark background.

Double Construction - Seals Only
Only portion of flag or banner with graphics is sewn back to back.

Applique (Sewn Graphics)

Single Sided - same as printed

Single Construction Positive front, reverse back
Fabric layered on both sides of field to create design. Fabric appliqued to field and then field is trimmed out on backside.

Double Construction - Positive front and back/
2 fields sewn back to back.

Instructions to Upload A File & File Specs

Photos need to be scanned at 300 dpi and saved to full size. For very large images you can save at 72 dpi and save to full size.

First choice would be to save as an:
1- Acrobat PDF
2- Adobe Illustrator EPS with fonts outlined
3- Adobe Illustrator TIFF
4- JPG or JPEG (this must be a large file so resolution and sharpness is retained)

We suggest saving scanned images to 75 sq. ft. or less projects at 300 dpi, 75-150 sq. ft. projects at 150 dpi and over 150 sq. ft. projects at 72 dpi

If layout has fonts then save to outline to avoid the need to have you send any printer or screen font files.

NOTE: We do not work with Corel, Quark or Adobe In Design file formats. MS Word files can be converted sometimes - but is not recommended for large format printing.

All non photographic files with lettering need to be saved to Illustrator EPS outline to avoid the need of printer and screen font files.

Non-vectorized files should be about 1/2 + 2Mb per sq. ft. of banner. Contact us for larger upload files.

How to Send A File to Us

**Shopping Mall Interior before remodeling**

Bannerscapes is a full service company dedicated to the Design, Manufacture and Installation of Fine Architectural Banners. Our commitment is to help you bring your property, your people and your customers to life.

**Full In-House Service**

Complete Planning, Design, Production and Technical Services all under one roof. All facets of our work can be handled by in-house personnel. We have Designers, Artists, an Architect and an Engineer on staff. Also at our disposal are commissioned Banner and Graphic Specialist. We will gladly work with your Graphic and Design personnel, help write specifications and supervise or instruct on the installation should you prefer to have us supply finished product only.

**Fabric and Colors**

Numerous fabrics are available. The most popular fabric is a 3 oz. nylon which has a wonderful array of 45 colors. We are constantly adding new colors to our palette and can provide custom colors for large orders. Bannerscapes also has a full range of colors in both polyesters and acrylics. Each project has different needs and variables that come in to play. We can offer a selection that will best suit your needs.

**Fire Retardant**

Most fabrics have flame resistant treatment available while many fabrics are inherently flame resistant.

**Fabrication**

Each job is fabricated by our own seamstresses in our Houston facility. Close scrutiny is kept to offer you the best quality possible.

**Hardware**

is available in steel, brass, fiberglass, stainless steel and aluminum. Attachments are designed for safety, appearance and strength.
